HELION STORAGE

Helion HX-280 LFP storage module

Stationary energy storage for commercial and industrial sites.

Built for a circular future

16 % recycled lithium

Roadmap target for 2031

Why HX-280?

Long life: 6000 cycles nominal at 25 °C, 0.5C, 90% DoD.

High efficiency: typical round-trip energy efficiency of 95.5 %.

Manufactured by Helion Storage Technologies B.V., Industrieweg 21, 5651 GM Eindhoven, Netherlands.

FICTITIOUS SAMPLE DOCUMENT - invented for software testing. Not a real product, company or certificate.

Technical data

Parameter	Value
Module serial number	HX280-26-004417
Battery category	Industrial battery
Cell chemistry	LFP (LiFePO4)
Rated capacity	280 Ah
Nominal voltage	51.2 V
Voltage range (min / max)	44.8 V / 57.6 V
Maximum power	14.3 kW
Nominal mass	128 kg
Idle (storage) temperature	min -10 °C, max 45 °C
Place of manufacture	Eindhoven, Netherlands
Date of manufacture	2026-06
Critical raw materials	lithium, natural graphite
Carbon footprint (per kWh, life cycle)	58.3 kg CO2e/kWh
Recycled lithium, this production lot (pre + post consumer)	6 %
Expected lifetime	15 years
Extinguishing agent	Water mist

FICTITIOUS SAMPLE DOCUMENT - invented for software testing. Not a real product, company or certificate.
